More Performance More Affordable

- Accuracy and efficiency
- The power of speed and simplicity
- Match competitors' colors in seconds
- Attract and keep customers
- Surpass your competition
- Evolutive solution
- Help visualize chosen colors

SELECT KIT PERFECT MATCH IN SECONDS

Datacolor Select Kit™ is a value priced solution to color matching and selection offering many of the same features found in more expensive systems including color measurement, fast colorimetric search and formula identification using state-of-the-art measurement and search engine technology, customer formula storage, retrieval, and adjustment.

FEATURES

• Accuracy and Efficiency

Your customers have the true feel of advanced technology. This means they can measure their sample, quickly reference it to a physical standard and get the paint they want. Their data is stored and they can come back later to get same color paint again.

• The Power of Speed

Reduce the time it takes to get the color from the customer's brain to the bucket. This means you reduce needless iterations of finding the right formula. Datacolor Select Kit search engine quickly shows the best match from hundreds – even thousands – of colors.

When you buy a Datacolor Paint family product, you are ensured that your investment is protected because you can easily add options or get upgrades without having to purchase a new system as technology changes. Add options, rather than purchase a new system. When you want a turnkey system, Datacolor Paint Station includes everything you need so that you can focus on sales and customer satisfaction.

• Simplicity

Datacolor Select Kit is a very simple and easy to use tool. This means that does not require a lot of training and you can easily integrate your existing database.

FEATURES

	DATACOLOR SELECT KIT
Measure and Search for the Nearest color of your paint manufacturer's database and then compare it with the paint manufacturer's fan deck and find the associated formula	✓
Search Competitive Fan Decks for the closest color(s) in manufacturer's collection	✓
