3	VALIDATING DATACOLOR SOFT WARE	

1 Installation Overview

This document describes the installation of Datacolor Software to your computer's hard disk. If you have purchased your computer from us, the software will be already installed. If you purchased your own computer, follow these instructions to install our software on your computer.

Before you begin the installation, you should have all installation USB's, and Microsoft Windows* should be properly installed on your computer.

1.1 System Requirements

The system requirements shown below are the minimum configuration to ensure effective operation of the standard Datacolor SORT software. Configurations below stated requirements may work but are not supported by Datacolor.

Component	Recommended	
Processor	Dual Core processor	1
Memory RAM	8 GB	1
Free Hard Drive Capacity	500 GB	1
Video Resolution	True Color	2
Available Ports	(1) RS-232 Serial (for older spectrophotometers)(3) USB	3
Operating System	Windows 10 (32 or 64 bit)	4
Email (for supported level)	Outlook 2007 or above, POP3	
Authenticated Sybase Database supplied with the system	Sybase 12.0.1. EBF 3994	
Optional Textile Database for SQL upon request	Microsoft SQL Server 2012	5
Server OS	Microsoft Server 2016	6

Notes:

datacolor

1) Minimum system configurations may limit performance, data capacity and operation of some features. Faster processor, more memory and faster hard drives will significantly enhance performance.

2) Accurate on-screen color display requires monitor calibration and true-color video mode.

3) Datacolor spectrophotometers use either an RS-232 Serial or USB connectors. Datacolor Spyder5™ requires a universal serial bus (USB) connection.

Printer port requirements (Parallel or USB...) depend on the specific printer selected.

4) Windows 32 bit and 64 bit operating systems are supported. 64 bit hardware running Windows 32 bit operating system is supported. Datacolor Tools is a 32 bit application. 64 bit hardware running Windows 32 bit operating system is supported.

5) Microsoft SQL Server 2012 is supported on Tools textile database..

6) Windows Server 2016 is supported.

Before You Begin

- Microsoft Windows[®] should be properly installed on your computer.
- You must have Windows Administrator rights to install this software.
- **Restart the system before installing the software.** This removes any memory-resident modules that may interfere with the installation and is especially important if you have been running a previous version.
- Install Sybase V12 database management software.
- Close all other programs that are running.
- Have all program installation readily available.

Important, Before You Begin! You must have Administrator Rights to install this software and you must have installed Sybase first!

2 Installation Procedure

To install Datacolor SORT

- 1. Place the Datacolor SORT USB into the port.
- 2. Select the Menu.exe

The Main Installation menu should appear automatically:

When the Main Installation Menu is displayed, choose "**Install Datacolor Sort**" The installation will guide you through installation.

Select a language from the list box.(Language include Chinese (simplified), Chinese (traditional), English, French (standard), German, Italian, Japanese, Portuguese (standard) and Spanish.)

Datacolor Sort - InstallShield Wizard	
Choose Setup Language Select the language for the installation from the choices below.	No.
Chinese (Simplified) Chinese (Traditional) English French (Standard) German Italian Japanese Polish Portuguese (Standard) Spanish Turkish	
K Back	ext > Cancel

Click "**Next**". The installation wizard will start - follow the prompts to install Datacolor SORT on your computer.

The next dialogs only appear if pre Spectrum software is already installed on the system. If it's a new installation the Setup proceeds with the <u>Welcome</u> dialog.

When you upgrade from SmartSort1.x to Datacolor Datacolor SORT v1.5, the Setup uninstalls the old software before the new Software is installed (DCIMatch; SmartSort; .CenterSiceQC, Fibramix, matchExpress or Matchpoint)

The Setup asks if you have made a backup of your entire database. If not, clock 'No' to exit the setup.

datacolor **me**

Question	1	X
?	Have you made a backup of all of your databases (dci_itm.db, printform	n.db, dci_alab.db)

Depending on the installed software you are informed about the un-installation process. The Setup program shows a message for each program that should be installed.

	System reboot required. Setup has completed installing Datacolor Sort.			
	 Yes, I want to restart my computer now. No, I will restart my computer later. Click Finish to exit Datacolor Sort setup. 			
K Back Finish Cancel				

Click "Finish" to restart your computer.

Datacolor SORT is now installed on your system!

3 Validating Datacolor Software

Datacolor Spectrum Software is protected from unauthorized use by a software license. When the software is initially installed, the software license is in a demo period that will allow access for a fixed amount of time. In order to run the software after the demo period, the software license must be validated.

There are a number of ways to validate the software. In general you will need the following information:

- 1. You will need the **Serial Number** for your software. This number is supplied by Datacolor and is found on the USB case.
- 2. You will need a **Computer Validation Number**. This number is generated by the security software and is unique to your computer.

Validation information is accessed and input in the Datacolor Validation Window shown below:

	<u>datacolor</u>

It may take up to seven days to validate your softwa	re. Please
do so as soon as possible so that you won't be with use of this software.	hout the Continue Version 4.2.0

Datacolor Tools will display the Validation Window every time it starts during the demo period. The Validation Window can be accessed from "About" window in Datacolor Tools, select "License Info".

You can validate the software in 3 ways:

- Using a Web Connection Link is on the Validation Window. Example is shown below
- E-Mail Send Serial Number and Computer Validation Number for the product to <u>SoftwareLicense@Datacolor.Com</u>. You will receive an Unlock Response Number by e-mail that you will put into the Validation Window.
- Phone In the US and Canada phone toll free 1-800-982-6496 or call you local sales office. You
 will need the Serial Number and the Computer Validation Number for the product. You will be
 given an Unlock Response Number that you will put into the Validation Window.
